# From The CEO

Dear Clients, Partners, and Colleagues,

As we enter FY2026, organizations across every industry and agency are experiencing a period of unprecedented transformation. From government to commercial sectors, leaders are accelerating modernization, adopting AI at scale, and pursuing new levels of operational efficiency. At HyerTek®, our mission has never been clearer: to unlock knowledge and automate intelligence so organizations can move faster, operate smarter, and achieve measurable impact.

This year's Services Portfolio reflects HyerTek's evolution into an integrated modernization and intelligence partner. We have strengthened our capabilities across five connected domains—Modernization, Data & Analytics, AI & Automation, Advisory & Assurance, and Workforce Enablement—anchored by our delivery frameworks: DEFINE™, BUILD™, INSIGHT™, FORM™, and ALIGN™. Together, they form a unified ecosystem designed to help clients modernize today while preparing for tomorrow's innovations.

What truly differentiates HyerTek is not only our technical expertise but our commitment to responsible, transparent, mission-aligned transformation. Whether modernizing legacy systems, architecting secure cloud environments, building AI-ready data platforms, or equipping teams with new skills, our focus remains the same: delivering outcomes that matter.

I am incredibly proud of the impact we have created for our clients and even more energized about the road ahead. FY2026 will be a pivotal year for modernization and AI-driven transformation across the public and private sectors. HyerTek® is honored to be your partner on that journey. Thank you for your continued trust and collaboration. Together, we will build a smarter, more resilient, and more capable future.

Respectfully Yours,

Jack A. Hyman, Ph.D  
CEO & Founder, HyerTek® Inc.

# About HyerTek®

HyerTek® is a modernization and intelligence consultancy helping organizations unlock knowledge, automate intelligence, and accelerate mission outcomes. We integrate engineering, data science, cloud architecture, AI innovation, analytics, and workforce training to deliver secure, scalable, human-centered solutions for government and commercial clients.

## Our Mission

To unlock knowledge, automate intelligence, and turn insight into action—empowering organizations to modernize, elevate decision-making, and strengthen their workforce through human-centered, AI-ready, data-driven solutions and expert advisory.

## Our Values

**H**uman-Centered — Innovation that serves people first

**Y**ielding Results — We measure by outcomes, not effort

**E**mpowerment — Knowledge transfer is part of every deliverable

**R**eliability — We show up and deliver every time

**T**rust — Transparency and honesty guide every relationship

**E**xcellence — “Good enough” isn’t in our vocabulary

**K**nowledge — We share what we learn because that’s how we lead

### Corporate Snapshot

- **HQ:** Rockville, MD
- **Founded:** 2016
- **Size:** Small Business / SDB
- **GSA MAS:** 47QTCA21D002C
- **UEI:** VB6GZHHDA7G3
- **CAGE:** 7ZP05

# Our Four Pillars

HyerTek's capabilities are built around four connected pillars that help organizations modernize their technology, elevate intelligence, and empower their workforce. Together, these pillars form a unified ecosystem that drives measurable mission and business outcomes.

## Modernization

**Transform systems, applications, and architectures into secure, scalable, cloud-ready environments.** We modernize legacy platforms, reduce technical debt, streamline workflows, and deliver cloud-first solutions designed for long-term performance.

## Data & Analytics

**Unlock the value of data across the full lifecycle—from ingestion governance, and visualization.** We design AI-ready data ecosystems, modernize analytics platforms, and empower organizations with reliable, accessible, and actionable insights.

## Training & Advisory

**Guide transformation with strategic advisory and the workforce skills needed to sustain long-term success.** We deliver executive advisory, program assurance, and organizational readiness for confident decision-making. Our change management and technical and AI-based training drive adoption and sustained impact.

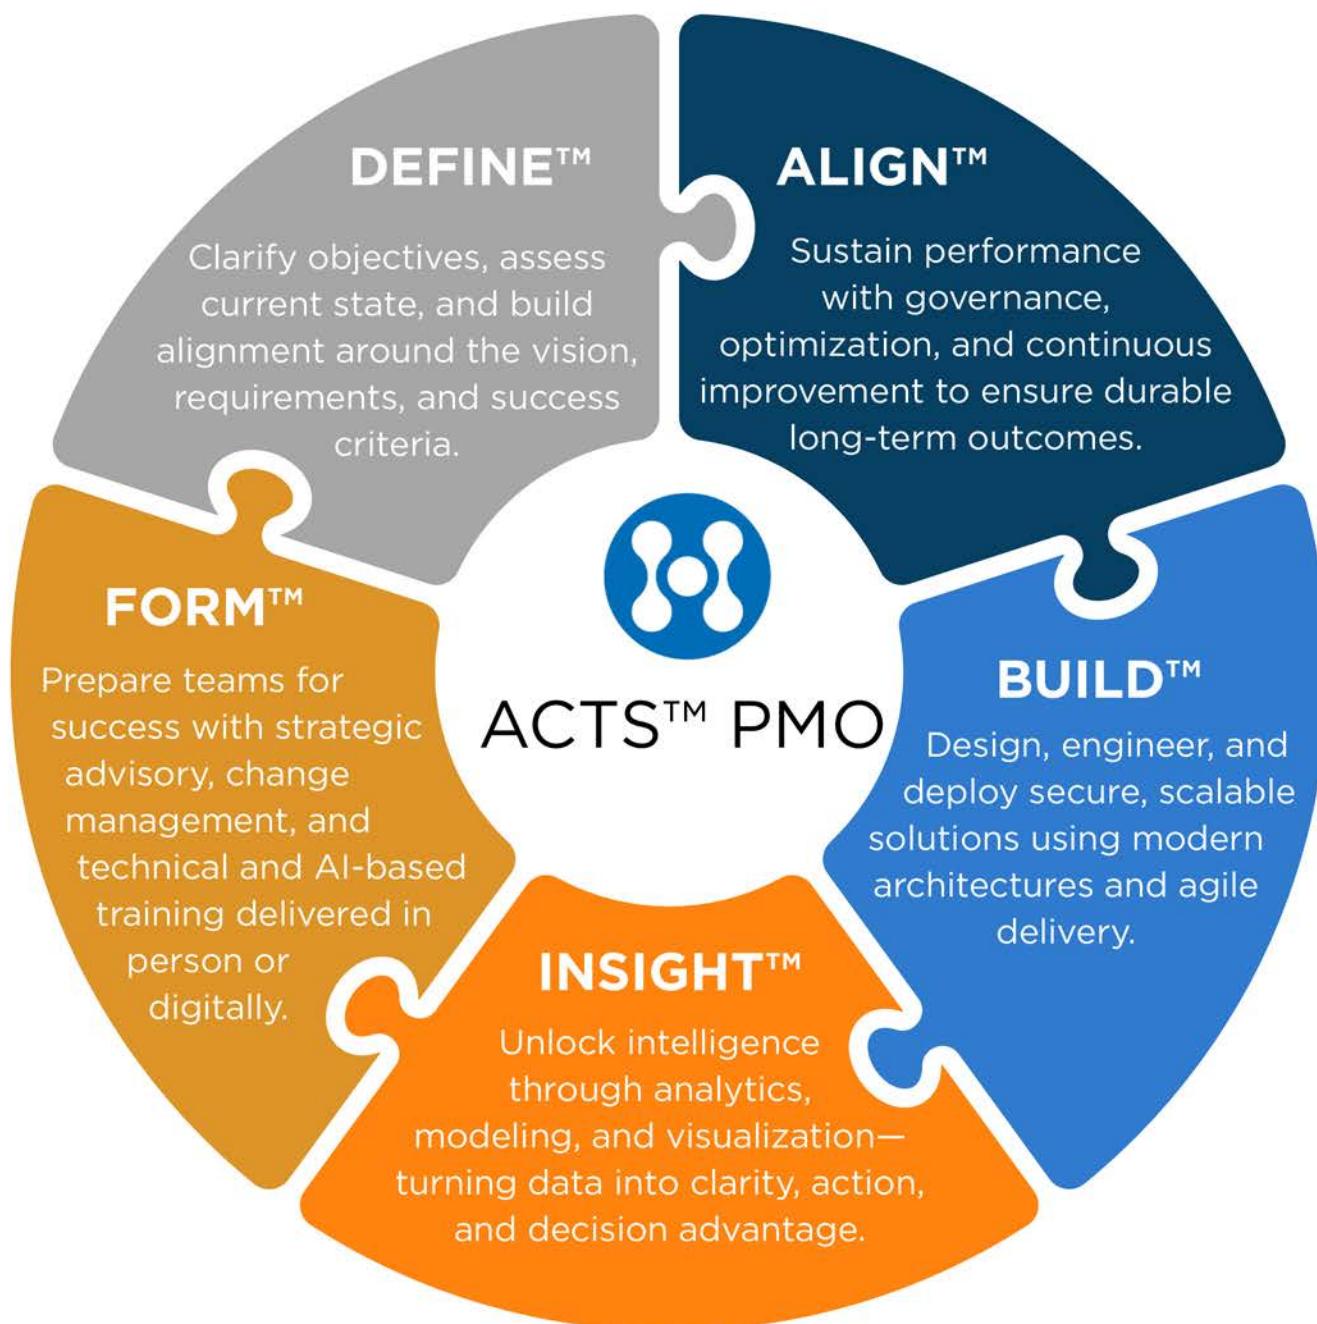

## AI & Automation

**Amplify human capability with responsible, mission-aligned AI and automation.** We design and deploy AI solutions, machine learning models, robotics process automation, and intelligent workflows that accelerate outcomes and improve accuracy.

# Delivery Ecosystem

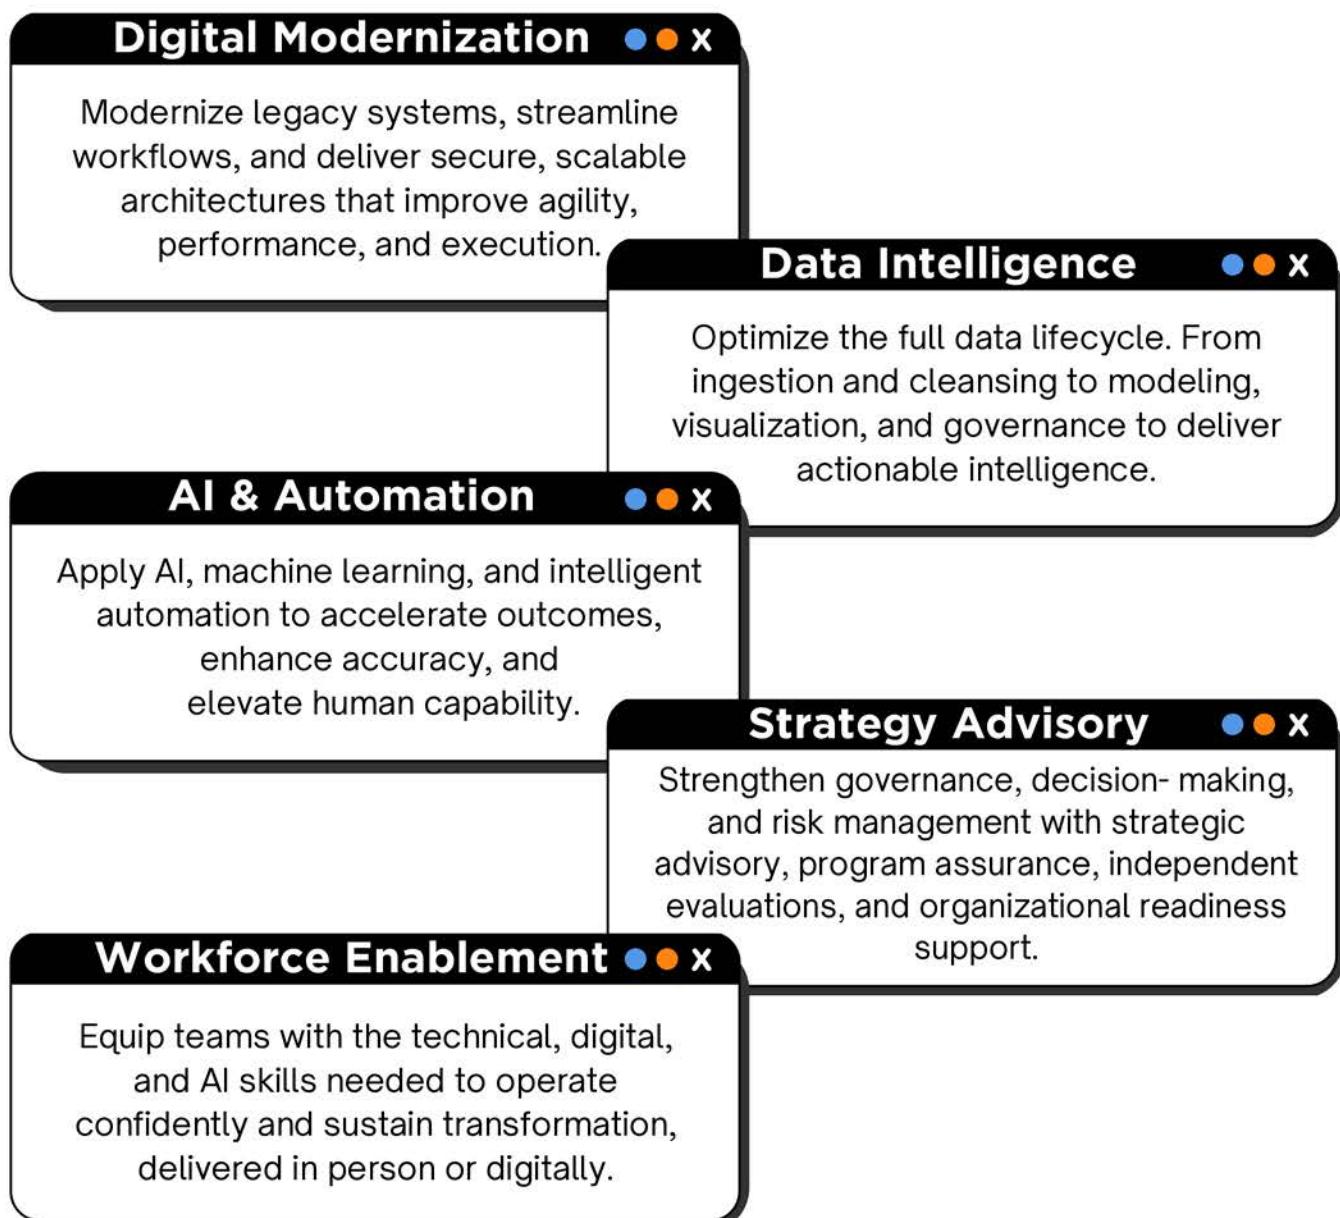

A unified, end-to-end delivery approach that ensures every modernization, data, AI, or advisory engagement is delivered with clarity, discipline, and measurable outcomes. Our ecosystem is built around five connected frameworks: **DEFINE™**, **ALIGN™**, **BUILD™**, **INSIGHT™**, and **FORM™**, supported by the **ACTS™** (Assess, Construct, Train, Sustain) project delivery methodology to ensure consistency and long-term success.

# Service Domains

HyerTek's capabilities span five interconnected domains that help organizations modernize their digital environment, unlock intelligence, operationalize AI, strengthen governance, and elevate workforce readiness. Together, these domains deliver end-to-end transformation across technology, data, operations, and people.

Each domain is powered by HyerTek's Four Pillars—Modernization, Data & Analytics, AI & Automation, and Training & Advisory—and delivered using our HyerTek Delivery Ecosystem and ACTS™ PMO methodology.

*Together, these domains form a unified capability ecosystem that helps organizations modernize with confidence today while preparing for the innovations of tomorrow.*

# Digital Modernization

Modernize legacy systems, streamline operations, and deliver secure, scalable digital environments that accelerate mission and business outcomes.

HyerTek® modernizes enterprise systems, applications, integrations, and cloud architectures using an end-to-end approach built on our frameworks. Our teams help organizations reduce technical debt, strengthen performance, and transition to modern, AI-ready environments built for long-term scalability.

## Core Digital Modernization Offerings

Purpose-built modernization services that reduce technical debt, streamline operations, and create enterprise-class, AI-ready enterprise environments.

### Cloud Modernization + Migration

Modernize and migrate workloads to secure, scalable cloud environments with modern architecture and governance.

### Application Modernization

Transform legacy systems into modern, modular, cloud-ready applications that improve performance and maintainability.

### Low-Code Modernization

Craft enterprise scale data driven applications, digitize workflows, and accelerate delivery using modern low-code platforms such as Microsoft Power Platform.

### Enterprise Systems Modernization

Modernize ERP, CRM, and mission systems to improve reliability, scalability, and insight across enterprise operations.

### Integrations & APIs

Create connected digital ecosystems with modern integrations, APIs, orchestrated workflows, and automated pipelines.

### Form & Workflow Digitization

Digitize paper-based or manual forms into modern, accessible, automated workflows using low-code and intelligent document processing.

## Our Modernization Lifecycle (Powered by BUILD™)

BUILD™ is HyerTek's execution engine — where architectures, applications, data pipelines, automations, and cloud environments are designed, engineered, and deployed using secure, scalable, and modern delivery practices. This framework transforms roadmaps into real, production-ready capabilities through disciplined engineering and iterative delivery.

### Benchmark

Assess legacy applications, data, and workflows to establish a modernization baseline.

### Upgrade

Redesign application, data, and UX for low-code

### Implement

Configure, develop, and integrate new applications, workflows, and analytics.

### Launch

Test, validate, and deploy to production (ALM optional)

### Deliver

Train users and sustain success using enablement.

# Data Intelligence

**Unlock the value of organizational data with modern, AI-ready architectures that power analytics, insight, and decision advantage.**

HyerTek® delivers end-to-end data modernization—from ingestion and cleansing to modeling, governance, analytics, and AI enablement. Using our INSIGHT™ Framework, we help organizations establish a unified, scalable, and interoperable data foundation that supports mission execution, operational intelligence, and enterprise automation.

## Core Data Intelligence Offerings

HyerTek's Data Intelligence services are fully vendor-agnostic—designed to work across the platforms our clients already trust—whether Microsoft, Snowflake, Oracle, IBM, Salesforce, or Qlik. We modernize and unify data ecosystems without forcing new tools or creating platform lock-in, ensuring interoperability across the enterprise. Our focus is on outcomes: connected, governed, and AI-ready data that empowers leaders to understand what's happening and anticipate what's next.

### Data Modernization & Integration

Migrate, consolidate, and connect data across legacy systems, cloud platforms, ERP, CRM, and enterprise applications using modern engineering practices.

### Data Quality, Cleansing & Enrichment

Improve accuracy, completeness, and trust in the data by removing duplication, reconciling inconsistencies, and enriching records for analytics and governance.

### Data Modeling & Preparation

Design schemas, dimensional models, semantic layers, metric stores, and entity models that support advanced analytics and mission-aligned insight.

### Advanced Analytics & Exploration

Explore trends, correlations, predictions, and scenario modeling using BI tools, statistical analysis, and cloud-scale compute platforms.

### BI, Dashboards & Visualization

Deliver intuitive, self-service analytics and dashboards that enable leaders to understand what's happening and anticipate what's next.

### AI-Ready Data Engineering

Prepare structured and unstructured data for machine learning, copilots, automation pipelines, document intelligence, and generative AI use cases.

## Our Data Intelligence Lifecycle (Powered by INSIGHT™)

INSIGHT™ is HyerTek's data modernization and analytics engine—where pipelines, models, catalogs, and visualizations are designed, engineered, and operationalized to transform raw data into clarity, action, and measurable outcomes.

### Identify

Evaluate data sources, systems, and use cases for modernization.

### Normalize

Cleanse and standardize data to ensure accuracy and consistency.

### Structure

Model and map data for analytics and AI-readiness.

### Integrate

Connect data pipelines and unify access across platforms.

### Generate

Deliver actionable BI and AI-driven insights for decision-making.

### Harmonize & Transform

Govern, sustain, and optimize the data.

# AI & Automation

*Accelerate mission impact with responsible, mission-aligned AI and intelligent automation.*

HyerTek® applies AI, machine learning, automation, and intelligent workflow engineering to help organizations improve decision-making, increase operational efficiency, and amplify human capability. Our approach is grounded in responsible AI governance, secure engineering, and measurable outcomes—connecting insight with action across the enterprise.

## Core AI & Automation Offerings

Purpose-built services that operationalize AI, reduce manual workload, modernize processes, and ensure secure, ethical adoption.

### AI Strategy & Responsible Adoption

Define vision, governance, ethical frameworks, and enterprise readiness for AI transformation.

### Intelligent Automation

Deploy secure automation that removes manual burden across mission and business functions.

### Machine Learning & Predictive Intelligence

Build models, chatbots, AI conversation solutions, copilots, agents, and decision systems aligned to mission outcomes.

### Document Intelligence & NLP Automation

Extract, classify, summarize, and validate documents using NLP, OCR, and LLM-powered cognitive services.

### AI-Ready Data Engineering

Design data pipelines and architectures optimized for AI training, inference, and automation workflows.

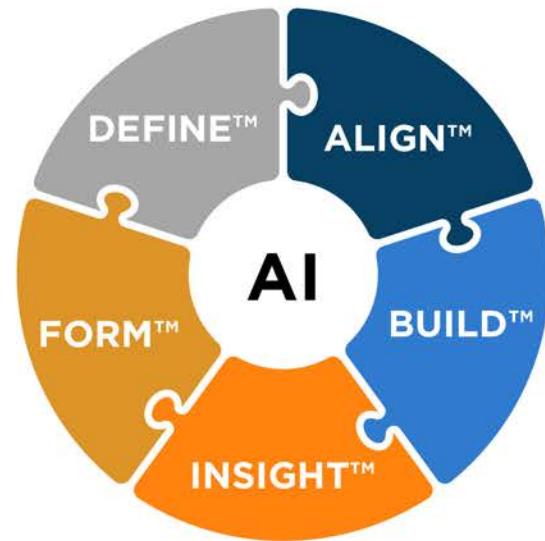

### MLOps & Lifecycle Sustainment

Operationalize models with monitoring, retraining, guardrails, and continuous optimization.

## Our AI & Automation Lifecycle

AI depends on every HyerTek® framework because it spans strategy, governance, engineering, intelligence, and workforce adoption. DEFINE™ sets the mission and business case, ALIGN™ ensures ethical and compliant oversight, BUILD™ integrates AI into systems and workflows, INSIGHT™ develops the models and automation, and FORM™ enables people to adopt and use AI effectively. Together, the interconnected frameworks ensure AI is purposeful, safe, scalable, and successfully adopted.

# Strategic Advisory

Guide modernization, data, and AI transformation with mission-aligned strategy, technical governance, and organizational readiness.

HyerTek® provides strategic advisory services that guide organizations through modernization, data, and AI initiatives with clarity. We blend technical expertise, program oversight, and readiness support to ensure transformations are feasible, scalable, and mission-aligned. By improving decision-making and execution, we help organizations reduce risk and accelerate outcomes.

## Core Strategic Advisory Offerings

Purpose-built services that strengthen governance, evaluate technical risk, support modernization, and prepare organizations for sustained transformation.

### Strategy & Technical Roadmapping

Advise CIOs, CTOs, and program leaders on cloud, data, AI, and modernization strategies — including architecture, sequencing, dependencies, and future-state readiness.

### Technical Assurance & Independent Review

Assess modernization, integration, data, or AI programs for feasibility, cost, schedule, risk, architecture quality, compliance posture, and delivery maturity.

### Architecture and Governance Advisory

Provide vendor-agnostic guidance on architecture, governance, platform selection, integrations, and data standards for secure, scalable enterprise environments.

### Risk, Compliance & Security Alignment

Support alignment with NIST, CMMC, FedRAMP, HIPAA, GDPR, Zero Trust, privacy requirements, and emerging AI governance standards.

### Enterprise System Selection & Evaluation

Provide vendor-agnostic guidance for selecting enterprise platforms through requirements definition, market analysis, evaluation scoring, demos, RFP support, and implementation readiness.

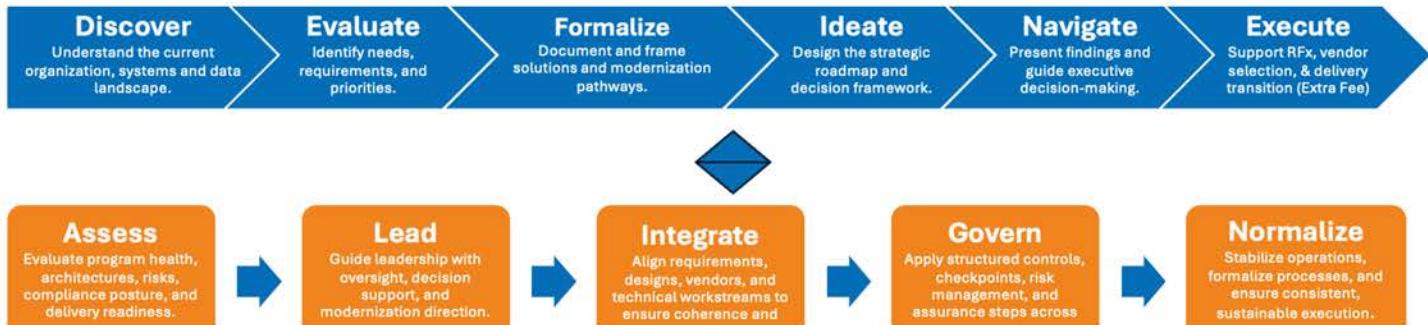

### Technical & Operations Readiness

Evaluate roles, processes, and operations to ensure organizations are ready to deploy, support, and sustain new technology.

## Our Advisory Lifecycle (Powered by **DEFINE™** and **ALIGN™**)

**DEFINE™** brings structure and clarity to modernization by assessing needs, risks, and options. **ALIGN™** strengthens execution with governance and assurance to validate architecture, manage risk, and keep programs on a stable, mission-aligned path.

# Workforce Enablement

Equip teams with the skills, guidance, and confidence needed to adopt new systems and processes through integrated instructional design, training, and organizational readiness.

HyerTek® provides comprehensive workforce enablement services that prepare employees and stakeholders to effectively adopt modern technology, data platforms, and new operational processes. By combining instructional design, curriculum development, training delivery, and change-readiness support, we help organizations build a skilled, confident workforce capable of sustaining transformation. Our approach ensures learning experiences are role-aligned, and directly connected to mission outcomes, reducing adoption risk and accelerating value realization.

## Core Workforce Enablement Offerings

Purpose-built services that strengthen user readiness, enhance workforce competency, and support lasting organizational adoption.

### Training & Course Delivery

Deliver role-based, instructor-led, virtual, and hands-on training sessions that equip users with the skills and confidence needed to adopt new systems, tools, and processes effectively.

### Technical Writing & Documentation

Develop clear, accurate, and user-friendly documentation—including job aids, SOPs, quick-start guides, knowledge articles, and reference materials—to support long-term proficiency and self-service learning.

### Instructional & Courseware Development

Design and build engaging learning experiences tailored to real workflows, including curricula, eLearning modules, simulations and assessment tools grounded in instructional design principle

### Learning Systems Support

Provide configuration, content management, and administration for learning platforms and tools, ensuring seamless access, reporting, and delivery of training materials across the workforce.

## Our Enablement Lifecycle (Powered by FORM™)

Our Enablement Lifecycle, aligned with HyerTek's FORM™ framework, guides users from readiness to lasting proficiency. In Foundation, we assess needs and define learning objectives. During Operationalize, we create targeted training materials and practical learning experiences. In Reinforce, we deliver training through live sessions, virtual modules, and guided practice. Finally, in Maintain, we provide follow-up resources, documentation, and assessments to support long-term adoption and sustained capability.

### Foundation

Understand needs, gaps, and desired outcomes.

### Operationalize

Design and develop tailored learning experiences.

### Reinforce

Deliver and embed learning across the organization.

### Maintain

Reinforce learning and skill mastery, provide ongoing value.

# Why HyerTek®

## Modernization With Clarity, Confidence, and Accountability

HyerTek® delivers secure, compliant, and mission-aligned modernization across systems, data, automation, and AI. Clients choose us for disciplined engineering, transparent delivery, and vendor-agnostic guidance that prioritizes what is right for the mission—not a product quota.

### A Connected Ecosystem of Capabilities

We operate as an integrated ecosystem combining modernization, data, AI, automation, and advisory services. Our frameworks connect strategy, governance, and execution into one unified approach to reduce risk and accelerate outcomes.

### Transparent, Audit-Ready Delivery

Our delivery model emphasizes clarity, documentation, and accountability. Every program benefits from secure architectures, governance controls, and rigorous assurance aligned to NIST, CMMC, FedRAMP, HIPAA, GDPR, and Zero Trust.

### Vendor-Agnostic Perspective

HyerTek is a capability-first partner. We evaluate systems, platforms, and solutions objectively, ensuring organizations adopt the right technology for their mission, environment, and workforce.

### Measured, Mission-Aligned Outcomes

We focus on tangible results: reduced modernization risk, validated architectures, stronger governance, faster decision cycles, and secure, scalable systems that endure.

## Creating Your Connected Ecosystem

HyerTek helps organizations create a connected ecosystem that unifies infrastructure, applications, data, automation, and governance into a secure, scalable, mission-aligned whole. Our vendor-agnostic approach ensures every design choice serves your objectives—not a product agenda—while our engineering and advisory expertise integrates each layer into a cohesive operating model. By aligning strategy, architecture, and execution, we help you build an ecosystem that delivers measurable outcomes, accelerates modernization, and positions your organization for long-term success.

## Partner With HyerTek® to Modernize With Confidence

Organizations across government and industry choose HyerTek® for secure, mission-aligned modernization that reduces risk and accelerates outcomes. Whether you are transforming legacy systems, building an AI-ready data ecosystem, strengthening governance, or empowering your workforce, HyerTek delivers clarity, accountability, and measurable results.

If you are ready to modernize with confidence—or want to explore how HyerTek can support your mission—we invite you to connect with us.

*Let's build your modern, intelligent, connected ecosystem.*
